

Bespoke cast-resin and live-edge furniture, made in-house on the Red Sea coast — built for salt air, hard sun and public life.

Strata N°01, pedestal table — three builds to date. Live-edge hardwood in Red Sea–turquoise cast resin.

WHAT WE BUILD

- Communal, bar and restaurant tables — engineered for daily public use
- Reception desks and counters with backlit resin faces
- Feature walls, room dividers, doors and architectural surfaces
- Outdoor and deck pieces in weather-treated wood and bamboo
- Guest-room and suite pieces in production runs
- One-of-one signature pieces — river tables, pedestal tables, screens

HOW WE WORK

- 01** Site survey and brief — on site in Egypt and the GCC, or from your drawings anywhere else
- 02** Sample pours and material board — tint, wood and finish approved from physical samples before anything is cast
- 03** Shop drawings and specification — dimensioned drawings, load and care specs, lead-time schedule for FF&E sign-off
- 04** Phased production and installation — crated, delivered and installed to your fit-out calendar

MATERIALS & ENGINEERING

- Cast resin, hand-tinted, clear to opaque — UV-inhibited systems
- Single deep pours, degassed and cured slowly — about three weeks before the first cut
- Figured hardwoods and live-edge slabs; hand-turned solid-wood bases
- Non-porous, sealed, serviceable surfaces — re-polishable
- A care and maintenance specification ships with every piece
- Every piece made in-house — one roof, one standard

LEAD TIME & DELIVERY

6–12 weeks from approved drawings, plus shipping · phased around your fit-out schedule · crated, insured and installed by our team or alongside your contractor · payment staged, terms set out in your quote.
